

Solenoid Bells

Combining good styling with functional efficiency, a range of motorised and traditional solenoid bells suitable for most fire alarm and security applications. The C. F. range of motorised bells incorporate a highly efficient rotary centrifugal movement combining high sound output with low current consumption, especially for the 24 volt versions.

Available with a choice of 4", 6" or 8" gongs to suit a wide range of installation requirements, the 4" bell is ideal for use in hotel bedrooms where a sound level of 75dB(A) is required at the bedhead.

The solenoid bells incorporate a traditional interrupted solenoid movement giving a high sound output and are suitable for external use when fitted with a weatherproof gasket box.

All bells have centre gong disc which can be customised by printing a company name or logo.

- WIDE RANGE OF VOLTAGES AND GONG DIAMETERS
- LOW CURRENT CONSUMPTION ON 24V MOTORISED BELLS
- OPTION OF CUSTOMISED DISCS PRINTED WITH COMPANY NAME AND LOGO
- TERMINALS WILL ACCEPT 2.5 MM² CABLES
- SIMPLE INSTALLATION VIA MULTI FIXING BASE PLATE FOR ALL TYPES OF LOCATION
- RANGE OF GONG FINISHES AVAILABLE
- 4" DIAMETER MOTORISED BELL IDEAL FOR BEDHEAD INSTALLATION
