Detection Feeder Cable

ViAC-WLF1/5/10

AquaCall Water Leak Feeder Cable is used to carry the connection from the ViAC-WLI AquaCall Water Leak interface, to detection zones using AquaCall water leak detection cable or a detection probe.

Only one length of feeder cable can be used, chosen from 1.2m, 5m or 10m lengths.

The feeder cable wires into a standard green two-way connector on the AquaCall Water Leak Interface ViAC-WLI (fitted) and then connects into the detection cable or probe via a waterproof connectors (fitted).
